SUMMARY

Full-stack developer with 5 years of experience taking features from the React and TypeScript interface down to the API, database, and AWS deployment. Strong in dashboards, admin tools, user management, and role-based access control. Former team lead who oversaw code reviews and coding standards, and works test-first with Vitest, React Testing Library, and Playwright.

SKILLS

Front End: React, TypeScript, JavaScript, Vite, Next.js, Tailwind CSS, shadcn/ui, Ant Design, TanStack Router and Query, React Router, React Hook Form, Zod, Redux Toolkit, HTML, CSS

Back End and APIs: Python, Django, Django REST Framework, Flask, Node.js, Express.js, REST APIs, GraphQL, JWT authentication, WebSockets

Databases: PostgreSQL / Supabase (row-level security), MySQL (Amazon RDS), Amazon DynamoDB (global secondary indexes), MongoDB, schema design, migrations and backfills

Cloud and DevOps: AWS (Lambda, API Gateway, Cognito, DynamoDB, RDS, S3, CloudFront, AppSync, KMS, CloudTrail, CloudWatch, Amplify), AWS SAM, Serverless Framework, CloudFormation, Terraform, Docker, GitHub Actions, CI/CD, Linux

Testing and Quality: Vitest, React Testing Library, Mock Service Worker, Playwright, pytest, moto, test-first development, code reviews and pull requests, ESLint, Prettier, Ruff, logging, monitoring and alerting

Payments and Integrations: Stripe, PayPal, Google Pay, Twilio, Amazon Chime SDK, Amazon Lex, Epic (EHR) API, EasyPost

Tools and Practices: Git, GitHub, GitLab, agile delivery, mentoring junior developers

WORK EXPERIENCE

Freelance Full-Stack Developer

Jan 2026 – Present

Independent | Remote

Clinical research data review tool (React, TypeScript, AWS)

- Built the React and TypeScript web app (Vite, Tailwind CSS, shadcn/ui, React Hook Form, Zod, TanStack Query) where researchers review, confirm, and correct patient data fields pulled from Epic.
- Built its TypeScript API on AWS Lambda (SAM, API Gateway, DynamoDB, Cognito, KMS), with CloudTrail auditing, CloudWatch alarms, and no patient identifiers in any log.
- Tested with Vitest, React Testing Library, Mock Service Worker, and Playwright; deployed to S3 and CloudFront through GitHub Actions with AWS OIDC.

Video-meeting platform (React, TypeScript, Python, AWS)

- Built meeting, scheduling, and dashboard features in React and TypeScript (TanStack Router and Query, Ant Design, Tailwind CSS), with live video on the Amazon Chime SDK and real-time updates over AWS AppSync Events.
- Built Django REST Framework APIs on AWS Lambda (Serverless Framework) with MySQL on RDS, including Django migrations, async and scheduled Lambda jobs, and a Dockerized slide-conversion service.
- Provisioned infrastructure with CloudFormation and Terraform (remote state with locking, RDS IAM authentication, Cognito), deployed through GitHub Actions.

Mobile gifting and payments app (Python, AWS, Stripe)

- Built serverless Python APIs on AWS Lambda (SAM) and DynamoDB, with Stripe payments and transfers, Twilio SMS verification codes, Cognito sessions with refresh-token rotation, and pytest and moto tests.
- Rolled out a new DynamoDB index with backfill scripts behind a feature flag, on staging first and then production, and built a daily scheduled sync that refreshes the stalest records first.
- Built session handling for the React partner portal (automatic token refresh, 24-hour session cap) with Playwright end-to-end tests.

Other client work

- Built backend services (REST APIs, authentication, cloud deployment) for a content-moderation system, and instrumented logging, tracing, and debug tooling across its microservices.
- Added voice and chat commands to a Flask chat API using an Amazon Lex bot.

Team Lead / Full-Stack Web Developer **Oct 2022 – Jun 2026**

SparkSoft Solutions Inc. | Quezon City, Philippines

- Led a 9-person team delivering a government HR information system (HRIS) that serves 20,000+ active users (React, TypeScript, Node.js, AWS).
- Designed and built backend APIs powering admin workflows, reporting views, and operational tooling, with authentication and role-based authorization.
- Oversaw code reviews, enforced best practices and coding standards, and mentored junior developers.
- Deployed and operated secure, scalable services on AWS (Amplify, Cognito, Lambda, API Gateway, CloudFront), managing multiple environments across the release cycle.
- Partnered with stakeholders to scope requirements and refine the backlog, keeping delivery predictable and on schedule.

Junior Software Developer **Jun 2021 – Sep 2022**

SparkSoft Solutions Inc. | Quezon City, Philippines

- Sole developer on the initial build of the government HRIS (React, Node.js, Express.js, MongoDB, JWT authentication), before it grew into the team's flagship product.
- Built a full-stack, real-time gate-entry monitoring system with WebSockets, showing each visitor's name and temperature reading live on security guards' monitors.
- Developed and maintained REST APIs for web front ends and internal tools; handled debugging, testing, and performance improvements across the team's services.

PROJECTS

Ask the Docs **ask-the-docs-eight.vercel.app**

AI document Q&A using retrieval-augmented generation (RAG): answers are grounded in the user's text and displayed with citations to the exact source chunks.

Next.js | TypeScript | Tailwind CSS | Gemini | RAG | Vitest | Playwright

Moderation Dashboard **moderation-dashboard-one.vercel.app**

Trust and Safety review queue with role-based access (viewer, moderator, admin), an append-only audit log, and Postgres row-level security enforced at the database.

Next.js | TypeScript | Tailwind CSS | Supabase | Row-level security | Vitest | Playwright

EDUCATION AND CERTIFICATIONS

BS, Computer Engineering | AMA Computer College – Calamba Campus | 2015 – 2018

Full-Stack Web Development Bootcamp | Zuitt Coding Bootcamp Philippines | 2021

AWS Academy Graduate – AWS Academy Cloud Foundations | Amazon Web Services | 2022
